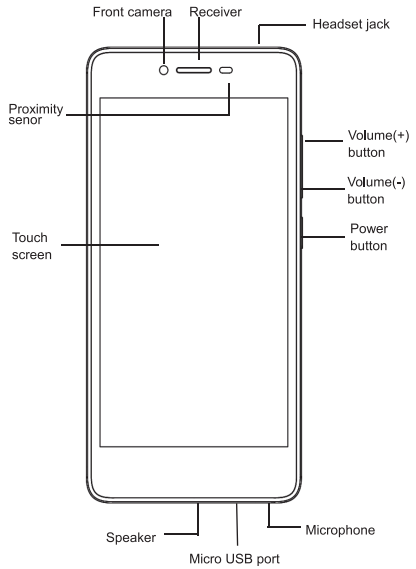
InFocus M505

A1s

Quick Start Guide



InFocus Information

SAR Information

THIS MOBILE DEVICE MEETS GUIDELINES FOR EXPOSURE TO RADIO WAVES. Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The exposure guidelines for mobile devices employ a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit stated in the ICNIRP guidelines is 0.910 W/kg averaged over 1 grams of tissue. Tests for SAR are conducted using standard operating positions with the device transmitting at its highest certified power level in all tested frequency bands.The actual SAR level of an operating device can be below the maximum value because the device is designed to use only the power required to reach the network. That amount changes depending on a number of factors such as how close you are to a network base station. The highest SAR value under the ICNIRP guidelines for use of the device at the body is 1.32 W/kg. Use of device accessories and enhancements may result in different SAR values. SAR values may vary depending on national reporting and testing requirements and the network band.

Important Safety Information

- Use a wireless hands-free system (headphone, headset) with a low power Bluetooth emitter.
- Make sure the cell phone has a low SAR.
- Keep your calls short or send a text message (SMS) instead. This advice applies especially to children, adolescents and pregnant women.
- Use cell-phone when the signal quality is good.
- People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.

RoHS Compliance

This product is in compliance with DIRECTIVE 2011/65/EU OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 8 June 2011, on the restriction of the use of certain hazardous substances in electrical and electronic equipment and its amendments.

For more detailed information, see the User Guide.

Charging the Battery

Before using the phone, it is recommended to fully charge the battery first.

1. Connect the smaller end of the USB cable to the USB port of the device.
2. Connect the other end of the cable to the USB charger or other USB port with power source (for example, laptop).
3. Plug the AC adapter to a wall outlet to start charging.

Warning

- Charge only indoors and in dry environments.
- For safety, the overheat protection will be active during charging. If the system temperature reaches above the maximum level, the device will automatically stop charging. The device will only resume charging when normal operating temperature is reached.
- If there is no reponse after you press the power button or touch the panel, press and hold the 'power button and volume (+) key' for 10 seconds, phone will phower off, If you hold the 'power button and volume (+) key' for 5 seconds more, it will restart.
- InFocus standard for water ingression criteria.

(1) Water ingression label become red color or contaminated.
(2) Water marks or corrosions on device PCB or components.

- Please make sure the temperature for adapter will not be higher than 50℃
- Do not store your phone in temperatures higher than 60℃
- The operating temperature for this device is from -10℃ to 50℃

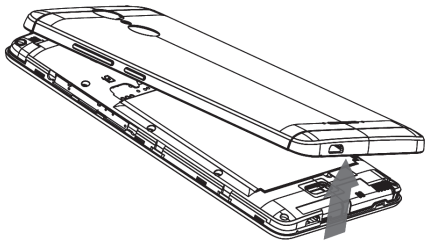
WEEE Notice

The WEEE logo on the product or on its box indicates that this product must not be disposed of or dumped with your other household waste. You are liable to dispose of all your electronic or electrical waste equipment by relocating over to the specified collection point for recycling of such hazardous waste. Isolated collection and proper recovery of your electronic and electrical waste equipment at the time of disposal will allow us to help conserve natural resources. Moreover, proper recycling of the electronic and electrical waste equipment will ensure safety of human health and environment. For more information about electronic and electrical waste equipment disposal, recovery, and collection points, please contact your local city center, household waste disposal service, shop from where you purchased the equipment, or manufacturer of the equipment.
Do dispose according to the local laws and regulations of your region.

SIM / SD card installation

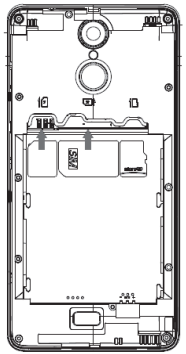
1. Power off mobile.
2. Refer to the following picture for SIM / SD card installation.

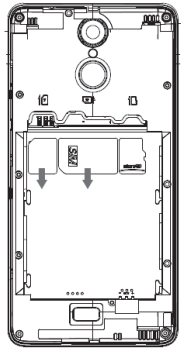
Removing the cover and SIM cards.
1. Unclip the cover.
2. To remove the SIM cards, press and slide it out.
Installing the SIM cards and cover.



Installing the SIM cards and cover.

1. You must insert your SIM cards to make phone calls.
2. To install SIM cards, place the SIM cards with chip facing downwards, and then slide it into its slot. Make sure that it is correctly inserted.
3. Close the phone cover.





Installing and removing the SD card.

1. Insert the external SD card into the slot with the gold contact facing down. To remove the external SD card, gently press and slide it out.
2. In addition, regularly removing or inserting the SD card may cause the phone to restart.
